

Guide: Registration Steps

[Mobilithek.info](https://mobilithek.info) - Mobilitätsdaten Deutschland

Simply follow the steps to create your own account:

1. On the top right corner, press the icon to create an account with your email (private/university/work).
2. Once finished, verify your account by clicking the verification link in your registered email.
3. You don't have to register an organization. Send your email account to Lukas, and he will add you to the organization.

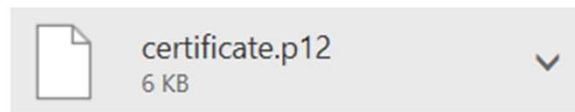

Guide: Registration Steps

All individuals should have their own machine account.

To register a machine account for your device:

1. Contact Organization Manager (Lukas)
2. Add User (including User's phone number) to the portal.
3. Get an SMS on your phone and a certificate file from the manager.

4. Clone the project (Follow README.md)

Guide: To Use the Tool

Configuration:

1. Get the pull url ready: (in Mobilithek -> My Subscription -> DELFI GTFS Trip Updates -> HTTPS Access Points)
2. Get your certificate.p12 and your SMS message ready.
3. Change the config.yaml field:

```
realtime:
  p12_file: "H:/the_coding_environment/railway_operation/gtfs-data-mandf/gtfs-merging-and-fusion/config/testcertificate.p12"
  #Use / always, when copy/pasting directly from your file explorer.
  p12_password: "T34hM61D@WAh"

  pull_url: "https://mobilithek.info:8443/mobilithek/api/v1.0/container/subscription?subscriptionID=9123226150625116"
  # THIS URL IS FOR TRIP UPDATE FETCHES ONLY. TO get Service alert, Please uncomment the following line and use the
  # pull_url: "https://mobilithek.info:8443/mobilithek/api/v1.0/container/subscription?subscriptionID=89718668588872"
```

Use: Run main.py and follow the working panel guide.
